

Guideline for the MOTIVATION LETTER

An important part of your application to our MSc programme is – beside your certificates – the motivation letter. Please stick to the following guideline and answer all questions, otherwise your application cannot be considered.

Guideline:

1. Personal understanding of “renewable energy engineering and management” (one sentence).
2. Motivation to apply in relation to your previous experiences/education (half a page).
3. Motivation to apply in relation to your future aspirations / preferred occupation in line with the two possibilities of specialisation that the REM programme offers: energy systems technology and renewable energy management and planning (half a page).
4. Name three main benefits you expect to gain from the M.Sc. programme (list).
5. Name three main contributions you could make to the M.Sc. programme (list).
6. Five arguments/personal characteristics, why you should be selected according to your own view (list).
7. Personally signed declaration that this motivation letter was written by yourself and without external help. If any external contents are being used, the source has to be given.

The motivation letter as a whole should be no longer than 2 pages.
